From: Ane-Marie Harb, Comefri USA Quality Manager and SME Nashville Chapter 43 Chair

Subject: Letter of Recommendation for Jake Mahoney

I highly and strongly recommend Jake Mahoney to receive an educational award for year 2024-2025. Jake is a Freshman Mechanical Engineering Student at Michigan Technological University (MTU), and he is also my mentee in the SME Bright Minds program. Jake has hands-on experience in manufacturing through his current internship with a local manufacturing plant (Innotec) in Zeeland, Michigan. He is a self-motivated student who has done multiple certifications and Tooling-U SME courses.

Jake's transcripts/grades and projects experiences are an indication of his dedication, perseverance and skills for the STEM/Engineering field. He is knowledgeable in CAD and computer-aided manufacturing (CAM) tools, CMM, additive manufacturing materials.

The classes in his current major degree will give him the engineering fundamentals and experiences needed to be successful in the engineering/manufacturing fields. Please contact me if any other information will be needed.

Best Regards,

Ane Marie Harb
Quality Manager/Comefri USA
Chair/SME Nashville Chapter 43
